To: Contractors within the Town of Pawlet

From: Pawlet Select Board

Re: Conditional Use and Guidelines for the Town of Pawlet Slag Pile

The slag pile is located on the south side of VT Route 153 across from the town shed in West Pawlet. The intention of the Pawlet Select Board is to manage the location in a way that improves the adjacent road condition and to provide a benefit to residents and contractors who live in Pawlet. Therefore, we ask you to follow these guidelines when loading or removing material from the location:

- Slag is not to be sold to residents, rather you can bill them for time loading and hauling.
- Slag is only to be used in Pawlet, not hauled to other towns, unless approved by the Pawlet Select Board.
- There is limit of 500 yards of fill/ per job site, without the prior approval of the Select Board.
- In order to work in the quarry, contractors must:
 1. A certificate of insurance on file with the Town Clerk, with coverage of at least \$1,000,000
 2. Contact Keith Mason, Road Crew Foreman, or Bob Jones, Member of the Pawlet Select Board, so that they can coordinate work and identify areas of need.
 3. Record the amount of material that is removed. The fee for use is \$1 of in-kind service/ yard
- When working in the quarry, please be aware of the following safety concerns:
 1. Do not undermine the pile
 2. Do not leave an overhang
 3. Replace road blocks when you leave
 4. Leave the site better than you found it and leave it “safe”
